CATEGORY: Semi-Permanent

Can be used immediately following a relaxer service.

No ammonia. No peroxide. Provides intense gray coverage with Advanced O₂ Technology and works as a great refresher for permanent color to add luster to dull-looking hair.

Advanced O₂ Technology uses oxygen in the air as the catalyst to develop the color vs. heat or hydrogen peroxide. The end result is shiny, moisturized color with gray coverage that lasts up to 12 shampoos.

Nine intermixable shades that cover gray on heads with up to 50% gray.

MIXING

All Advanced Gray Solution shades are intermixable for custom colors. No developer is used with Advanced Gray Solution shades.

Intermixing with Beautiful Collection Moisturizing Color is not recommended.

APPLICATION

Apply directly from bottle generously and thoroughly to shampooed and towel-dried hair.

TIMING

Process 25 minutes at room temperature. Use of heat is not recommended. Rinse well and do not shampoo.

FORMULATION GUIDE

DESIRED RESULT	FORMULATION
Enhance natural color	Select shade in the desired level and tone
Cover up to 50% gray	Choose an Advanced Gray Solution shade in the desired level and tone
Brighten natural color	Choose a color 1 - 2 levels lighter
Refresh permed, relaxed or color-treated hair	Select shade in the desired level and tone

PRO TIP

“BE SURE HAIR IS THOROUGHLY RINSED AND SHAMPOOED PER RELAXER DIRECTIONS BEFORE APPLYING ANY BEAUTIFUL COLLECTION SHADE.”
